

## SAMPLE SAFETY TRAINING CERTIFICATION

(On this page, information about the subjects, performance exercises, and written tests is described. In this sample, the topic of this training was Hazard Communication.)

The following information was discussed with students: (check all covered subjects)

- Overview of the hazard communication program - the purpose of the program
- Discussion of the hazards of chemicals to which students will be exposed
- GHS container labeling requirements
- Discussion of the 16 sections of the SDS and their location
- Emergency and Spill procedures
- First aid procedures
- Symptoms of overexposure
- Use/care of required personal protective equipment used with the above chemicals
- Employee accountability

The following practice/performance exercises were conducted:

- Spill procedures
- Emergency procedures
- Personal protective equipment use

(Optional: You need written tests to verify personal knowledge about a topic. Keep these written tests as attachments to the course plan and merely reference it here.)

A written final exam was administered to the student and was successfully completed. A sample of the test is maintained in the course plan. Below is a partial sample of questions on the test:

1. Where is the "Right to Know" station (or SDS station) located? (in the production plant)
2. What PPE is required when exposed to \_\_\_? (short answer)
3. How do you clean the PPE used with \_\_\_? (short answer)
4. What are the emergency procedures for overexposure to \_\_\_? (short answer)
5. Describe spill procedures for \_\_\_\_. (short answer)
